COMPANY PROFILE

Dear Colleagues, Partners and Well-Wishers,

Our Company is a modernized enterprise integrated with R&D, manufacturing, sales and services, having a complete set of integrated sales team, applying brand strategy, setting up enterprise image, and being the advocator and Pioneer in the field of Ceramics.

Keep improving and striving for excellence is the core strategy to our quality improvement. Our Company is devoting itself to exploring deeper on global sanitary ware, so as to provide high-quality products and sincere, sophisticated services to the whole customers, to build up the better life for all human.

The people of Our Company will put their best efforts in the direction of providing luxurious bathroom solutions to our respected customers. The dynamic team of marketing and the innovative technologists will design and style products for the demanding customers.

In our quest to make life great, we will always make our processes efficient to make pricing affordable to most of the people of our country and around the world. Our processes and management systems will be improved continuously to ensure that our bathroom solutions will value for money for the customer and a great business proposition for our dealers and distributors.

The future is challenging, but we are sure that we will beat the milestones set by us. We are setting a goal for future to meet our vision of being the most recognized brand in bathroom solution for a long time that make homes better and lives happier. We inspire people to live their Dreams and drives Growth.

CHARACTERISTICS

All seats and covers are subjected to a weight test.

All seats and covers are subjected to an open/close test.

All WC pans are subjected to an odor leakage test.

Saves water with only 1 Ltr. of water consumption.

Soft Close Seats & Covers
Soft Closing and silent
Special technology

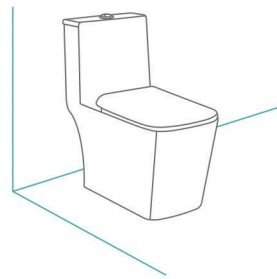

Requires very little space and provides easy bottom cleaning.

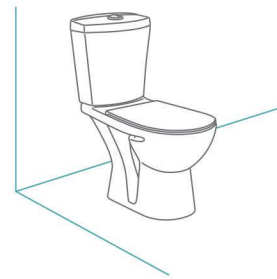

Anti Bacterial Glazed

HYPER FLUSH TECHNOLOGY

Hyper Flush is an advanced flushing technology designed to deliver powerful and efficient performance in modern sanitary closets. It uses a specially engineered flushing mechanism that releases a strong and controlled flow of water, ensuring thorough bowl cleaning in a single flush. This powerful action helps remove waste quickly and effectively, maintaining better hygiene with minimal effort.

One of the key benefits of Hyper Flush technology is its optimized water usage. The system is designed to maximize flushing efficiency while using a controlled amount of water, making it both powerful and water-saving. By improving the flow dynamics inside the bowl, it ensures effective cleaning without the need for multiple flushes.

Another important advantage of Hyper Flush is its smooth and quieter operation. The advanced mechanism allows water to circulate efficiently, reducing noise while delivering strong performance. This makes it suitable for modern residential and commercial bathrooms where comfort and efficiency are equally important.

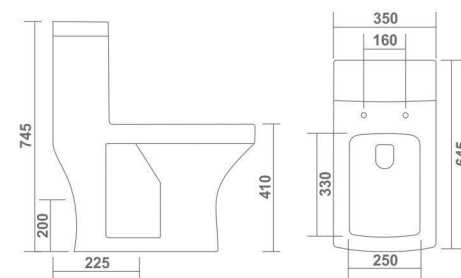

With its strong flushing force and smart water distribution, Hyper Flush technology helps keep the bowl cleaner for longer by reducing residue buildup and maintaining higher hygiene standards. It represents a modern approach to sanitation by combining performance, water efficiency, and reliability in everyday bathroom use.

RIM-LESS TECHNOLOGY

Rimless technology is an innovative design approach used in modern closets to improve hygiene and cleaning efficiency. Unlike traditional designs that have a concealed rim around the bowl, rimless closets feature an open flushing edge that allows water to flow directly and evenly around the entire bowl surface. This design ensures more effective cleaning while eliminating hidden areas where dirt and bacteria can accumulate.

One of the biggest advantages of rimless technology is enhanced hygiene. Since there is no enclosed rim, there are fewer places for germs, limescale, and residue to build up. The open design allows water to reach every part of the bowl during flushing, providing a more thorough wash and maintaining a cleaner surface after every use.

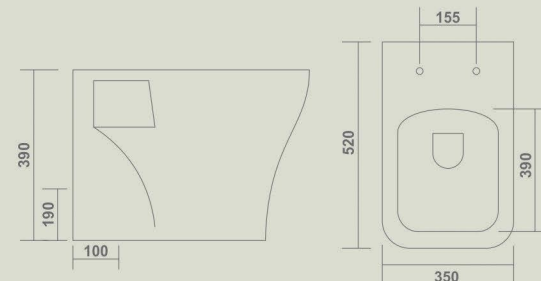

Rimless closets are also easier to clean and maintain. Without the traditional rim structure, users can access the entire bowl surface while cleaning, making routine maintenance quicker and more convenient. This reduces the need for excessive cleaning chemicals and effort, helping maintain long-term cleanliness with minimal maintenance.

In addition to hygiene and practicality, rimless technology also reflects modern bathroom innovation. The streamlined design not only improves performance but also complements contemporary bathroom aesthetics. By combining efficient flushing, easy maintenance, and improved hygiene, rimless technology has become a preferred choice in modern sanitary solutions.

WALL HUNG BASIN

As per shown in the picture, the rag bolt must be grouted into the cement/concrete wall. The bolts must be fixed to the cement/concrete wall. Allow setting & checking than install it using nut and washer.

COUNTER WASHBASIN

At the beginning

1. A skilled or experienced person should install counter lavatories.
2. Avoid using adhesive with this product.
3. Check the waste area and supply tubing if required.
4. Do not open the lavatory from its protective carton until you are ready for installation.
5. Please follow all local building and plumbing codes.

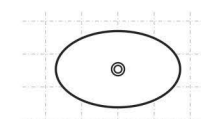

MATERIAL & TOOLS

Measure tape, Keyhole or saber saw, Hammer, Glasses, Rags or Paper toweling, Drill (1/2 dia, drill bit or larger), Pencil, sealant, sharp knife or scissors.

INSTALLATION OF LAVATORY

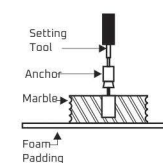

Please Note : Please install it in a way that future removal from underneath the counter top is possible without damaging the counter top.

1. Please check the desired location for clearance between the back splash, faucet, Fixture and cabinet.
2. Please cut the template.
3. Please carefully trace the template on the counter top directed.
4. Please mark the faucet hole centerline on the counter top.
5. Please drill a 1/2" pilot on the inside of the cut line.

For Wood Counter tops:

1. Mark and per-drill the wood screw holes at the locations shown on the template.
2. Waterproof any exposed areas of wood.

For Marble Counter tops:

1. Position the counter top upside down on foam padding to protect the surface. Mark and drill 3/6" holes 5/8" deep at the locations shown on the template.
2. Use a setting tool and hammer to secure the anchors.

For All Installations:

1. If the counter top has not been installed, install it at this time.
2. Drill the faucet holes according to the faucet installation instructions.
3. Install the faucet to the counter top according to the manufacture's instructions.
4. Install the drain to the lavatory according to the manufacture's instructions.
